

Manufacturing Indaba on internet

THE impact of the internet on manufacturing will be one of the things that will be explored at this year's Manufacturing Indaba billed for June.

The Manufacturing Indaba will host a one day conference focused on the Internet of Things and how this impacts manufacturers, providing understanding, knowledge sharing, the latest global trends

and engaging dialogue discussions.

The fifth annual indaba will be held in collaboration with the Department of Trade and Industry and the Manufacturing Circle, a corporate association of private sector manufacturers.

This year's event will explore Industry 4.0, otherwise known as the fourth Industrial Revolution.
